

LED TUBE LIGHTS SERIES 123-WEST 24-48Vac/dc.

- Protection outer tube in polycarbonate or acrylic diameter 50mm, also available in glass and acrylic diameter 60 or 70mm.
- Built-in electronic ballast 24V or 48Vac/dc, very high frequency working (900kHz)
- Inside painted aluminium slide suitable to hold LED strips
- Unit modular LED strips, each strip is composed by 10 power-led by 105lm, colour temperature 6200K
- High tolerance on power supply voltage (from 20 to 50Vac/dc)
- Working temperature: -15°C + 45°C
- Protection degree: IP67
- No 2 black end caps in polyamide 6.6 reinforced with glass fibre equipped with O-Ring made in oil- and acid proof rubber
- Side cable gland M16x1,5 (IP68) supplied with anti-tear device.
- MARKING: CE
